

Contents

1	Introduction	1
1.1	Timing Recovery Problem	1
1.2	Joint Timing Recovery and Equalization	3
1.3	Joint Timing Recovery and Error-Control Decoding	5
1.4	Summary	9
1.5	Problems	9
2	Fundamental of Timing Recovery	11
2.1	Introduction	11
2.2	Conventional Timing Recovery	12
2.3	Design of PLL Gain Parameters	15
2.3.1	Linear Analysis of First-Order PLL	15
2.3.2	Linear Analysis of Second-Order PLL	17
2.3.3	Finding the S-curve	21
2.3.4	Cycle Slip Phenomenon	23
2.4	Performance of Conventional Timing Recovery	24
2.5	Summary	26
2.6	Problems	27
3	Per-Survivor Timing Recovery	29
3.1	Introduction	29
3.2	System Description	30
3.3	PSP-Based Timing Recovery	31
3.3.1	PSP-MM Algorithm	31
3.3.2	New Timing Error Detector	33

3.3.3	A Trellis View of Conventional Timing Recovery	36
3.4	Numerical Results and Discussion	36
3.5	Convergence Behavior	39
3.6	Complexity Reduction of PSP-MM	41
3.6.1	The M-algorithm	42
3.6.2	The T-algorithm	43
3.6.3	Performance Comparison	43
3.7	Summary	44
3.8	Problems	46
4	Per-Survivor Iterative Timing Recovery	47
4.1	Introduction	48
4.2	System Description	49
4.3	Review of the NBM scheme	50
4.4	PSP-BCJR	52
4.4.1	Forward Recursion	54
4.4.2	Backward Recursion	55
4.4.3	Complexity of PSP-BCJR	56
4.5	Numerical Results and Discussion	57
4.5.1	Complexity Versus Performance	61
4.6	Complexity Reduction of PSP-BCJR	64
4.6.1	The M-algorithm	64
4.6.2	The T-algorithm	66
4.6.3	Performance Comparison	66
4.6.4	Note on Complexity Reduction of PSP-BCJR	66
4.7	Extrinsic Information Transfer (EXIT) Chart	68
4.7.1	EXIT Chart for Iterative Timing Recovery	68
4.7.2	Simulation Setup	70
4.7.3	Predicted Bit-Error Rate	71
4.7.4	Performance Comparison	72
4.8	Exploring Per-Survivor Iterative Timing Recovery	77
4.9	Summary	83

4.10	Problems	83
5	Reduced-Complexity Per-Survivor Iterative Timing Recovery	85
5.1	Introduction	85
5.2	System Description	86
5.3	PSP-SOVA	87
5.4	Numerical Results and Discussion	90
5.5	Summary	93
5.6	Problems	94
6	Applications To Magnetic Recording Systems	95
6.1	Background on Digital Magnetic Recording	95
6.1.1	Write Process	96
6.1.2	Read Process	97
6.1.3	Magnetic Recording Channel Model	100
6.2	Equalization and Target Design	100
6.2.1	MMSE Target Design	102
6.2.2	Effective SNR	104
6.2.3	Numerical Results and Discussion	105
6.2.4	Summary	110
6.3	Timing Recovery for Fast Convergence	113
6.3.1	System Description	114
6.3.2	Combining an Equalizer in PSP-Based Timing Recovery	115
6.3.3	Numerical Results and Discussion	115
6.3.4	Summary	120
6.4	Iterative Timing Recovery with PSP-BCJR	120
6.4.1	System Description	122
6.4.2	Numerical Results and Discussion	122
6.4.3	Summary	128
6.5	Iterative Timing Recovery with PSP-SOVA	128
6.5.1	System Description	128
6.5.2	Combining an Equalizer in PSP-SOVA	129

6.5.3	PSP-SOVA Algorithm with an Equalizer	129
6.5.4	Complexity Comparison	132
6.5.5	Simulation Results	139
6.5.6	Summary	146
6.6	Iterative Timing Recovery with PDNP Technique	146
6.6.1	Pattern-Dependent Noise-Predictive Technique	147
6.6.2	PSP-SOVA-PDNP	154
6.6.3	Numerical Results and Discussion	156
6.6.4	Summary	160
6.7	Problems	161
A Derivation of the Starting State Associated with the Best State Transition		163
B Derivation of the Starting State Associated with the Best Backward State Transition		165
